### Situation Awareness Brief

Sunday, June 2<sup>ND</sup> 2019  
As of 0900 CST

# Tropical Weather Awareness

A low pressure system located over the southern Bay of Campeche has changed little in organization since yesterday. This system is expected to move slowly northwestward toward the coast of Mexico, and it could become a tropical cyclone before it moves inland in a day or two. Regardless of development, the disturbance will likely produce heavy rainfall over portions of southern and eastern Mexico during the next few days. An Air Force Reserve reconnaissance aircraft is scheduled to investigate the disturbance later today, if necessary. Interests along the Gulf coast of Mexico should monitor the progress of this system. \* Formation chance through 48 hours...medium...60 percent. \* Formation chance through 5 days...medium...60 percent.

## Severe Weather Outlook

**Severe Weather Chances for: Sunday afternoon and night**

Weather Forecast Office

Lubbock, TX

Issued Jun 02, 2019 5:27 AM CDT

**Strong to severe storms are expected this afternoon into tonight, with some storms producing heavy rainfall, large hail and strong wind gusts. Make sure you have multiple ways to receive weather alerts.**

## Severe Storms Expected Again Today

### General Timing of Today's Storms

Weather Forecast Office

Amarillo, TX

Issued Jun 02, 2019 3:50 AM CDT

Right now this is our current thought on timing. However, we may be adjusting this forecast later given the morning storms and the impacts they may have on the severe weather chances later this evening.

# Hazardous Weather

## Severe Weather Today

Weather Forecast Office  
Amarillo, TX  
Issued June 2, 2019 4:08 AM CT

Multiple hazards are in play today, and tonight.

- Early Afternoon (Mainly Eastern NM)
  - Hail 1"-2" in diameter
  - Damaging Winds up to 70 MPH
  - Isolated Tornadoes
  - Possible Flooding (Flash Flooding)
- Early Evening (Mainly Eastern NM/Western TX Panhandle)
  - Damaging Winds up to 70 MPH
  - Flooding (Flash Flooding)
  - Hail 1"-2" in diameter
  - Isolated Tornadoes
- Late Evening into Overnight (Western, Central, and Southern TX Panhandle)
  - Damaging Winds up to 70 MPH
  - Flooding (Flash Flooding)
  - Hail 1"-1.50" in diameter
  - Isolated Tornadoes

NWSAmarillo

[weather.gov/ama](https://weather.gov/ama)

We expect severe weather today with all hazards possible, but the hail, wind, and potential for flash flooding will be the focus. Will not rule out isolated tornadoes. As stated in the Severe Timing Graphic, we may be looking at a shift in the forecast later due to this morning's storms and the impacts they may have on the severe potential later today.

## Severe Thunderstorm Potential Today

This Afternoon and Tonight

Weather Forecast Office  
San Angelo, TX  
Issued Jun 02, 2019 5:09 AM CDT

An isolated severe storm possible across northern and western sections this afternoon.

A complex of storms may again move into the Big Country again after midnight, with isolated severe storms north of I-20.

Main Hazards: Large hail and strong winds
